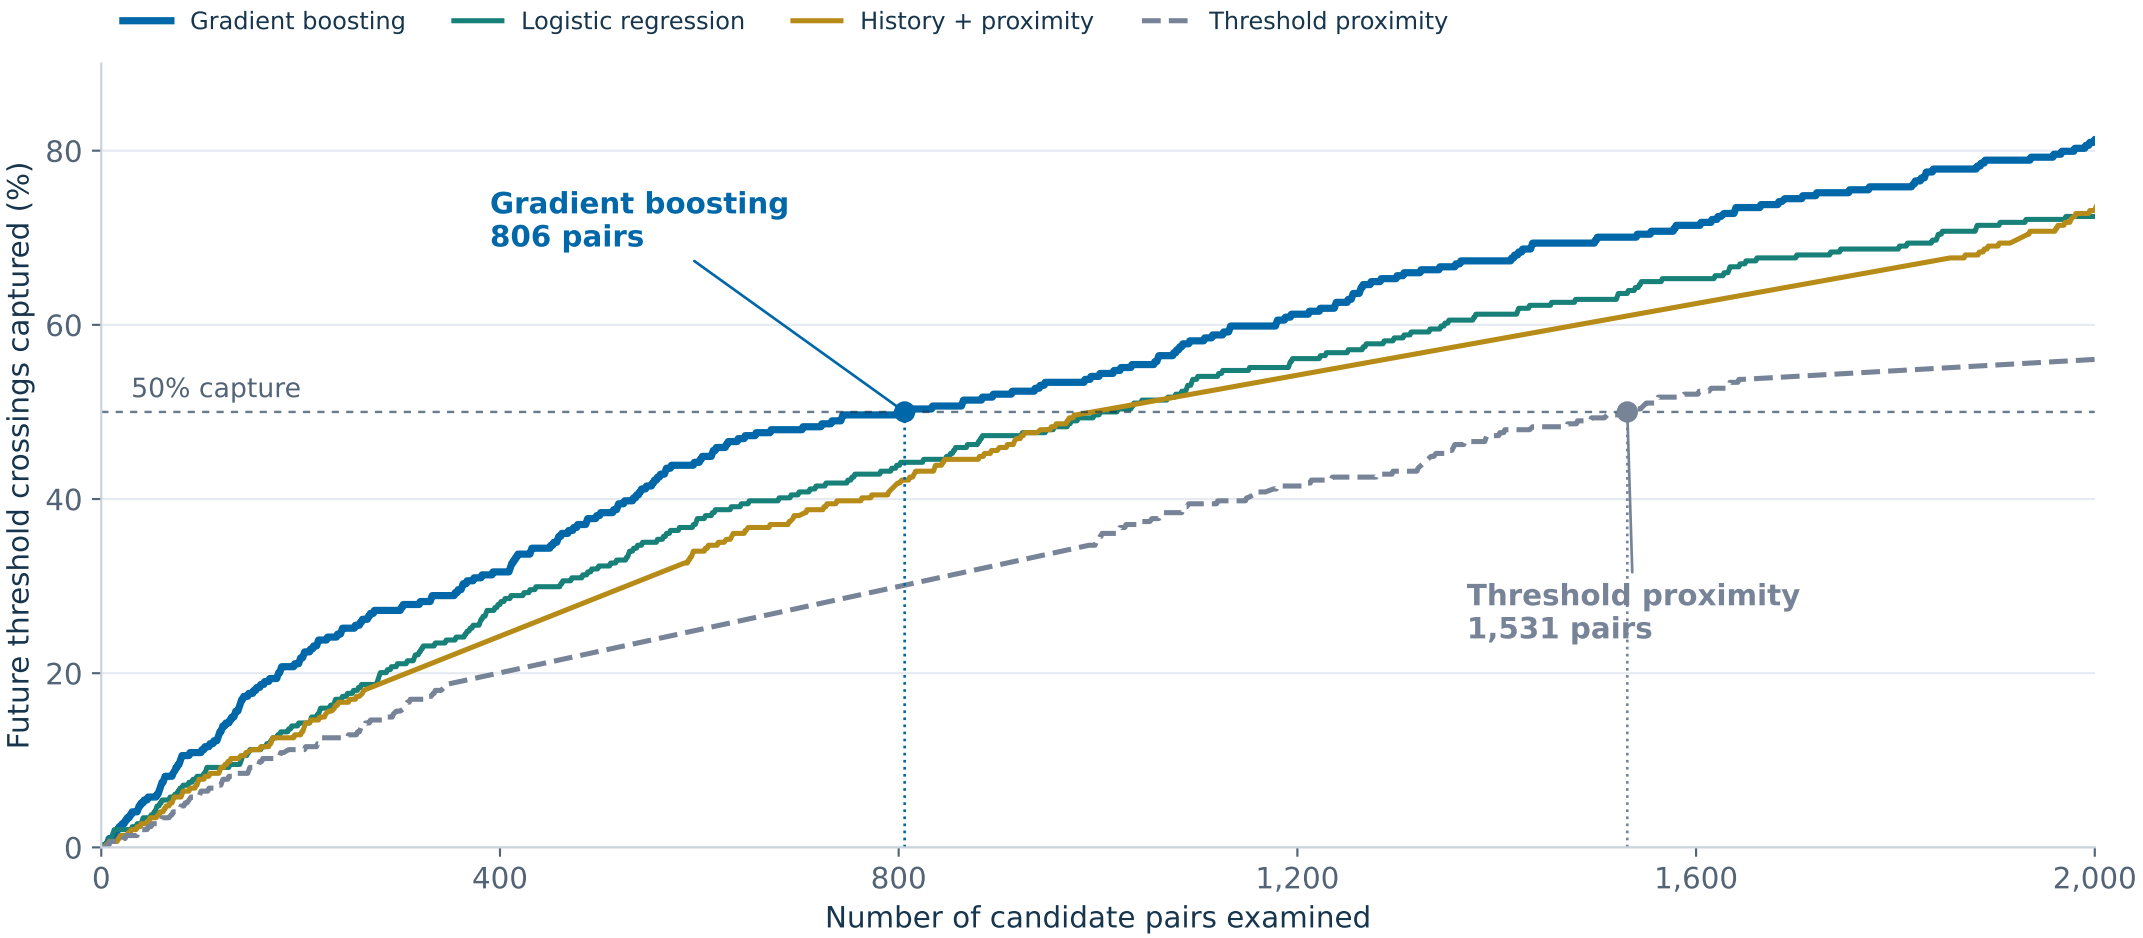
Half of the future crossings in 806 reviews

Final test: 2026Q1 candidates → 2026Q2 outcomes · 294 eligible future crossings



806 versus 1,531 is 47.4% fewer candidate pairs than threshold proximity.

The history-aware baseline is stronger. Tied-score segments show expected capture under random tie ordering.
This graph shows the first 2,000 positions; it measures candidate counts, not staff time or clinical benefit.
